### PROFILE SUMMARY

Cloud & DevOps Engineer with experience in designing, automating, and optimizing cloud infrastructure and CI/CD pipelines. Skilled in AWS, Docker, Ansible, and Jenkins, with a strong focus on automation, security, and scalability. Proficient in Linux administration, scripting, and monitoring tools (Prometheus, Grafana, CloudWatch). Passionate about streamlining deployments, improving system reliability, and implementing best DevOps practices.

### EDUCATION

2022 - 2026

SAVITRIBAI PHULE PUNE  
UNIVERSITY

RMD Sinhgad Institute of Engineering,  
Pune

- Bachelor of Engineering (TE)

### WORK EXPERIENCE

Coding Savvy

2024 - PRESENT

MERN Stack Development

- The frontend web development internship provided hands-on experience with HTML, CSS, JavaScript, and modern frameworks like React. I worked on responsive designs, improved UI/UX, and collaborated with backend developers to integrate APIs.
- The internship enhanced my problem-solving skills and understanding of performance optimization. I gained experience with version control (Git) and agile methodologies like Scrum

Eternal Destiny

Nov 2023 - Oct 2024

Information Technology Intern

- Provide technical assistance to employees, addressing issues related to hardware, software, and network systems. Support the management and organization of data, ensuring data integrity and security.
- Assist in the maintenance and monitoring of the company's network infrastructure. Stay informed about emerging technologies and trends relevant to the personal coaching industry.
